#**Name:** S.Rajitha #**Pin:** 21X05A6747 #**Branch:** Data Science #**College:** Narsimhareddy Engineering College

#**Project Title:** Prediction of iris.csv dataset for Decision Tree Algorithem using supervise learning machine Algorithem.

#**Problem Statement:** A American based botnical gardens grow iris flower in their labs but using bio technology in a single tree different type of variety flower is grow.As a Data Science Engineer find out how much accuracy is there all catagories contains same species.

[1]:
```
from sklearn.datasets import load_iris
from sklearn.model_selection import train_test_split
from sklearn.tree import DecisionTreeClassifier
from sklearn.metrics import accuracy_score
```

[2]:
```
# Load the Iris dataset
iris = load_iris()
X = iris.data
y = iris.target
```

[3]:
```
# Split the dataset into training and testing sets
X_train, X_test, y_train, y_test = train_test_split(X, y, test_size=0.2,␣
 ↪random_state=42)
```

[4]:
```
# Create a Decision Tree classifier
decision_tree = DecisionTreeClassifier()
```

[5]:
```
# Train the classifier on the training data
decision_tree.fit(X_train, y_train)
```

[5]:
```
DecisionTreeClassifier()
```

[6]:
```
# Make predictions on the test data
y_pred = decision_tree.predict(X_test)
```

[6]:
```

```

[7]:
```
# Calculate accuracy
accuracy = accuracy_score(y_test, y_pred)
```

```
print(f"Accuracy: {accuracy:.2f}")
```

```
Accuracy: 1.00
```

#**Conclusion:** A model is successfully completed in Decision Tree Algorithem using Supervision Machine Algorithem with accuracy of 1.00.
